

Year 5-6 'Horton Uni' Sessions beginning in Aut 2!

Each teacher in Year 5 and 6 has now created their own 'degree course' about something they are passionate about.

Children will vote for their favourite 'degree course' and be allocated a place based on this. Please note, some children may not get their first choices due to limited numbers on each.

When they successfully complete their course, they will graduate Horton Uni with their very own degree scroll.

LEARNING TOGETHER TO BE THE BEST WE CAN BE...

Professor Whitehead

offering a degree in ...

Languages and other cultures

When you choose this course, you will enjoy a taste of different cultures in every sense of the word! We will not only learn new words in different languages (Italian to begin with), but also find out about the country, look at and imitate their art, appreciate the music and sample the food! You will work on a range of subjects all linked to Italy - of particular interest to the boys may be Italian cars and football! We will also learn about famous Italian people both past and present. A highlight of the course will be taste testing the food, but what exactly that will be must remain a secret for now... Professor Whitehead is confident, however, that you will be asking for more!

If you want to travel in the future and make lots of new friends, choose this course and let the world be your oyster!

Arrivederci!

Professor Thomas

offering a degree in ...

Basketball

On this course, you will have lots of fun playing team games whilst developing your basketball skills at the same time. You will work on a number of skills throughout the course including throwing, catching, dribbling and shooting. You will also learn a variety of tactics to use when attacking as a team and different ways to mark your opponents to stop them from scoring. Each week you will use your new skills in team games.

Because basketball players need to have a very high level of fitness, you will also learn about the effect exercise has on your body and how important it is for your health.

If you want to work within a team, make new friends and be the next legend on the basketball court, then this course is the one for you!

Professor McKean

offering a degree in ...

Music with a twist

If you chose this course you will become a member of Horton School Sings, a new and exciting musical group.

Each week, we will learn and practice new music skills and songs. This half-term we will spreading Christmas cheer by singing loud for all to hear; practicing and performing all of your favourite Christmas songs. Later, we will be taking 'Horton School Sings' out into the wider community, giving us the chance to show off our new musical abilities to the world in performances.

If you love listening and singing along to music, or you see yourself as the next Ed Sheeran or Taylor Swift, this is the course for you!

Professor Temperley

offering a degree in ...

Computing and IT Practice

Are you willing to try new things? Are you interested in gaming and using computers? Do you have a creative streak? If so, Computing and IT Practice is the course for you!

In this course, you will have the chance to explore a range of computing programmes such as Scratch and Kodu. While completing tutorials using the software, you will develop your logical thinking, programming knowledge and design skills.

You will then have the opportunity to program, code and design your own computing challenges. If you see yourself as a game designer, you can create your own computer game, where you can build your own characters, levels and settings. Or you might see yourself as a future animator and could use your creative skills to program and code your own animations.

If you would like to develop your understanding of computing and the skills involved, while having fun and creating your own designs, then this is the course for you!
